

# Parasol Care

## By Neptune Classics

---

Thank you for purchasing a Neptune product. We hope that this will bring you years of enjoyment. To get the best from this Neptune product please read the details below.

**DO NOT USE THE PARASOL OR LEAVE THE PARASOL OUT IN WINDY CONDITIONS AS THIS MAY CAUSE DAMAGE TO YOUR PROPERTY AND THE PARASOL**

### Parasols Canopies -

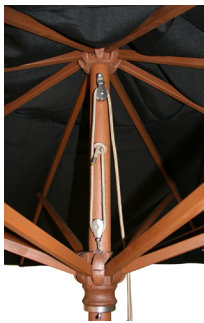

Neptune's parasol canopies are made from Duratex 55 which is rot resistant under normal circumstances.

They have been tested to have a UV protection rating of 4 out of 5 and so will offer you great protection from the sun. However they will not offer complete protection and the usual precautions should be taken.

Should your canopy become dirty it is possible to wash it on a 30°C wash. We would recommend that you should fit the canopy back to the frame and raise this when the canopy is drying to prevent it from shrinking. Please note that washing the canopy may affect it's colour.

### Parasol frames -

In order to prevent damage to the parasol frame care should be taken when lifting and raising the parasol. If any resistance is met, then it may be because the rope is tangled around the frame. Please see images below to check the path the rope should follow.

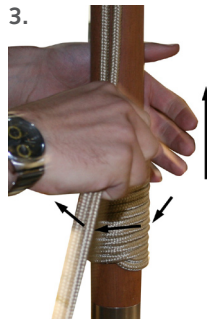

**Duratex**  
55

### Rope -

To tidy the rope away we suggest wrapping around the pole as below:

1. Pull the rope tight down and hold against the pole.
2. Wrap the rope around itself.
3. Continue to wrap around and upwards keeping tight to create a spiral of rope.
4. Finally tuck the end in tight at the top to secure.

Neptune does not accept responsibility or liability for any damage caused to the product due to treatment. Please keep this document and instructions for future reference.
